

AMENDMENTS TO THE SPECIFICATION

Please amend paragraph [0017] as follows:

[0017] Referring to FIG. 4, the support member 20 is generally U-shaped and includes vertically extending posts 22, 24 and a cross bar 26 extending therebetween. The vertically extending posts 22, 24 extend down to distal ends 21, 23. This constitutes substantially the frame of the [[body portion]] support member 20. [[The support member 20 may include an additional framing or reinforcement member 50, discussed subsequently.]] The vertically extending posts 22, 24 allow for vertical adjustment of the body portion 12 relative to the seat back 14. It will be appreciated that although two posts 22, 24 are shown in the Figures, the number of posts may vary depending upon the design of the head restraint assembly 10.
